

Dear Hiring Manager,

I am writing to express my interest in the Associate Software Engineer position at Capgemini. As a 2025 Computer Engineering graduate with hands-on experience in Java, Spring Boot, React.js, Docker, Kubernetes, and Microservices, I am excited about the opportunity to contribute to Capgemini's software engineering team.

During my academic journey, I developed several software projects that strengthened my technical and problem-solving abilities. My Microservices-Based Application involved building scalable backend services using Spring Boot, MySQL, API Gateway, and Service Registry while implementing distributed logging for better system observability. I also developed Tumor Lens, an AI-powered healthcare application with a Flask backend, React frontend, and Docker-based CI/CD pipeline, giving me practical experience in full-stack development and software deployment.

In addition, I designed automated CI/CD pipelines using GitHub Actions, GitLab, Docker, Helm, and Kubernetes, enabling faster and more reliable deployments. These projects helped me understand software development best practices, teamwork, SDLC, and the importance of writing maintainable, scalable software.

I am particularly drawn to Capgemini because of its strong engineering culture, focus on innovation, and commitment to developing talent. The Associate Software Engineer role aligns perfectly with my career goals, allowing me to learn from experienced professionals while contributing to high-quality software solutions. I am eager to expand my technical expertise, collaborate with cross-functional teams, and deliver impactful solutions for clients.

With strong analytical thinking, effective communication, and a passion for continuous learning, I am confident that I can quickly adapt and become a valuable member of the Capgemini team.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm align with the requirements of the Associate Software Engineer role. I look forward to hearing from you.

Sincerely,

Dipendu Kumbhakar
